About me

Software Developer with practical experience in Python, JavaScript, and DevOps technologies. Focused on backend development and cloud solutions. As a weekend student, I am fully available for full-time employment.

Technical skills

- **Programming Languages: Python, JavaScript**
- **DevOps: AWS, Terraform, Docker, Linux, GitHub Actions**
- **Backend: FastAPI, Node.js, Express.js, Django**
- **Frontend: React, TailwindCSS**
- **Databases: MySQL, SQLite, PostgreSQL**
- **Tools: Git, GitHub, Bash**

Languages

• Polish – Native

• English – C1 (Advanced)

Soft skills

- Troubleshooting & Problem Solving
- Teamwork & Collaboration

Experience & Projects

IT Support Intern 10/2024 - 01/2025
Municipality Office of Bargłów Kościelny

• Provided technical support (Helpdesk) to employees
• SQL database administration support
• Configuration and installation of network operating systems
• Diagnosed and resolved IT infrastructure connectivity and performance issues

InfraAgent – Autonomous AI Infrastructure Agent 11/2026

Autonomous AI agent for repository analysis, cloud infrastructure design, and AWS infrastructure automation.
• Designed a Multi-Agent architecture leveraging LLMs and the ReAct framework for autonomous task planning and execution
• Integrated GitHub OAuth for repository analysis, technology stack detection, and infrastructure recommendations tailored to application architecture
• Automated AWS infrastructure generation and modification using Infrastructure as Code (IaC)
• Implemented automated configuration validation, security analysis, and agent-driven error correction
• Developed Human-in-the-Loop mechanisms, infrastructure change integrity verification, and AWS cost estimation
Github

AI Log Analyzer & Security Ops 03/2026

A system for real-time automated log analysis using local LLMs
• Implementation of an architecture based on 4 Docker containers
• Automated detection of SQL Injection and Brute-force attacks using Llama 3.2 model
• Implementation of Shared Volumes for data exchanges between logs and the AI
• Host Gateway communication enabling containers to access the local LLM API
Github

JaworAI (SaaS AI Assistant App) 11/2025

Developed a modern SaaS web application featuring an intelligent AI assistant with content generation capabilities
• Implemented a full authentication and user management system using Clerk
• Integrated AI API for dynamic content generation
• Implemented payment processing functionality
• Designed a fully responsive user interface
Demo | Github

Education

WSB Merito University in Warsaw (part-time) 10/2025 - present

Bachelor of Engineering in Computer Science

CS50's Web Programming with Python and JavaScript 03/2025

HarvardX — comprehensive course covering web application development using Python (Django), React, and REST APIs

IT Technician, Augustowskie Centrum Edukacyjne 09/2021 - 04/2025

Curriculum included programming (HTML, CSS, JS), computer networks, and databases

Interests

• Foreign Languages
• Artificial Intelligence
